PREFACE

THIS volume completes the reproduction in type of the records contained in the earliest book now in the possession of the city, mainly used for probate proceedings of the town, a description of which may be found in the preface of Volume VI. of this printed series.

Transcripts of certain instruments relating to estates which came before the town council during the time that the manuscript book was in use, and which for some reason do not appear upon the town records, have been added in an Appendix.

For convenience and to avoid reference to other volumes the commissioners would state that the printing of this volume, like its predecessors, is authorized under several resolutions of the City Council of Providence, the first of which was approved March 6, 1891, and is as follows :

“RESOLVED, That Horatio Rogers, George M. Carpenter, and Edward Field, are hereby appointed record commissioners, who shall serve without compensation, for the purpose of collecting and printing the early records of the town of Providence. And said commissioners are hereby authorized to

expend the sum of one thousand dollars for collecting and printing said records, said sum to be charged to the appropriation for printing."

In the printing of this volume the same signs have been used as in former volumes, and for convenience the explanations thereof are repeated here.

The figures at the top of the pages, and enclosed in brackets, indicate the paging of this present volume.

The heavy figures enclosed in brackets represent the paging of the original book as it now stands.

This mark | shows the beginning and end of interlineations in the original.

Words or letters printed in parentheses are so found in the original.

Brackets enclosing blank space, thus, [] signify that something is missing, or illegible in the original.

The sign $\P$ is used to represent a contraction or double letter, which, in the original, stands for pr, and is used as the representative of syllables containing those letters with a vowel.

In very many cases the marks or signs manual made by illiterate persons to instruments, in lieu of their own proper written signatures, are reproduced in fac-simile on the records by the recording officer, but in print in this volume these signs are usually represented by an X, being the conventional sign commonly used for that purpose.

Four indexes follow the text in this book, viz.: an Index to Names; an Index to Indian Names; an Index to Subjects; and a Miscellaneous Index.
